

AIR HEATERS

Air Heaters

In-line air heaters are used to heat air or gas in a wide variety of applications such as:

- Baking
- Drying
- Laminating
- Metal Working
- Packaging
- Plastic Welding
- Preheating
- Sealing
- Shrink Fitting

Features

- Heat air to temperatures as high as 1000°F
- 1/2" and 3/4" diameters available
- Available with a variety of fittings
- Optional thermocouple at outlet for temperature control

Construction

1. Optional Bushing
2. Ceramic Coil Support
3. Resistance Element
4. Stainless Steel Sheath
5. Fiberglass Insulation Leads
6. Copper Tee
7. Optional Bushing
