

Isobars

For Thermoset Systems

Acrolab's Thermoset Isobar System can be incorporated into new or existing tool designs solving cycle time, curing time, and part quality issues.

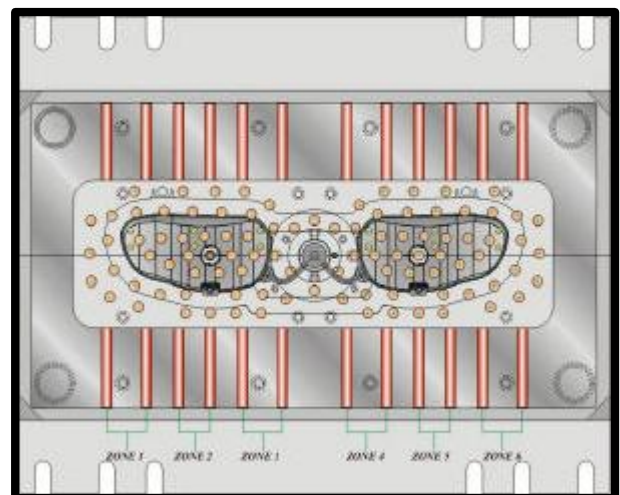

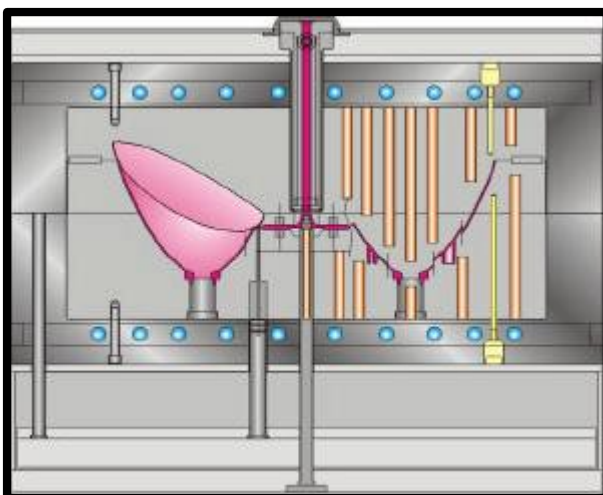

Acrolab's Isobar heat pipes are widely used in the thermoset industry. Isobars can bring heat rapidly and accurately to molding surfaces. This results in increased productivity.

Acrolab supplies a full range of engineering services for thermoset tools from design, to installation, to hands on customer service. Acrolab engineers will work closely with you to achieve the optimal thermal design for your applications.

Acrolab's Isobar's require no upkeep, therefore eliminating lengthy maintenance downtimes.

Acrolab's Isobar's will last the length of the tool save you time and money on replacement parts.
